Comment (if MAYBE)	If exclude recommended, do we need to reference check for other potential studies (YES / NO)	Comment		

Focus on fertility preferences
General health service focus
Reproductive health training

Focus on socio-demographic predictors of unintended pregnancy
study on sexual difficulties in men

Study on sexual risk behaviour

study on risk behaviour

Focused on fertility trends

It is a working framework

Discusses sociocultural context

Focus on balancing population and resources

Same information in 2012 publication by

Zaman et al, which is included

It is an editorial
